Documenting Issues/Technical Challenges

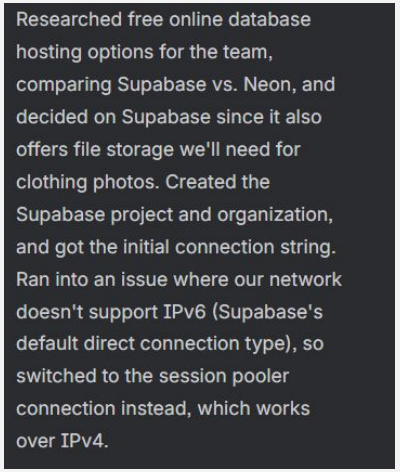

We documented in our :

- Worklogs
- Scrum Meetings (SCRUM 1 & SCRUM 2)
- Retrospective

By doing so, it allows for members of the team to stay updated with how everyone else's sprint went and lend a hand. To add on, leaving a paper trail serves as as a great reminder for when we look back in the future.

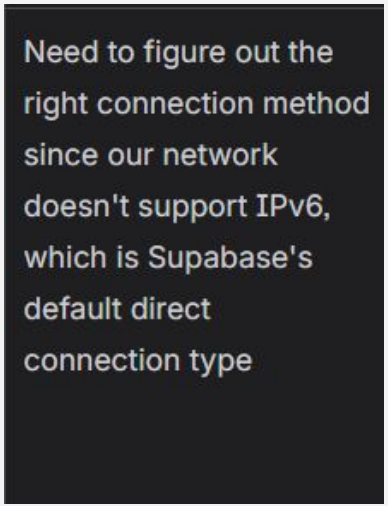

Worklog Examples:

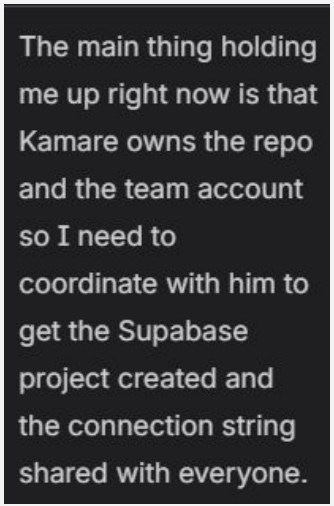

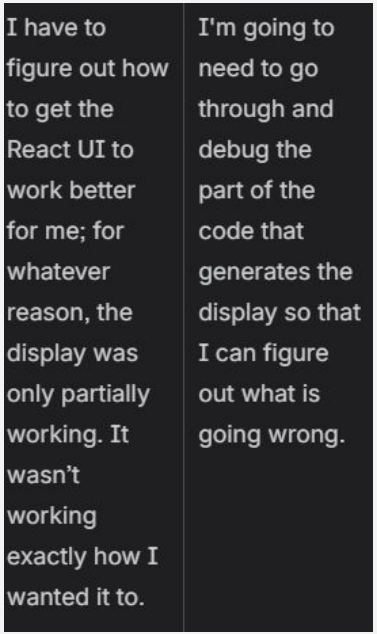

Documenting Issues/Technical Challenges

Succesfully connected our Wardrobe, Stylist, and Settings page to the home page. Thus, when one clicks on them from home page it directs them to it and they can co back to the home page. In addition, in event a connection is wrong or a incorrect url is enter it loads an error page rather than a blank page.

Jira Stories

For this assignment we simply decided to divide the presentation into four parts, metrics, retrospective, release demo, and documentation. Thus, every member would be responsible for one part of the presentation.
